

Club Handicapping System

A crash course on our club handicap system and how it works is as follows.

There are three separate club handicap series running through the season WASP, Summer and winter.

Each one has its own unique club handicap so if you cant make one series you still are able to compete in the others and it doesn't slant an advantage or disadvantage to one boat or another in that series, this works very well and will roll over i.e. handicaps at the end of current series x3 will be the ones at the start of next set of series and so on.

At the start of this season we introduced a sliding handicap system dependent on the number of boats competing this works very well (see below) we have run this model up to 16 boats per division which we are unlikely to exceeded this.

1	1.005	1.01	1.015	1.02	1.02	1.02	1.02	1.02	1.02
2	0.995	1	1.005	1.01	1.012	1.013333	1.014286	1.0151	1.015556
3		0.99	0.995	1	1.004	1.006667	1.008571	1.011	1.011111
4			0.985	0.99	0.996		1.002857	1.0051	1.006667
5				0.98	0.988	0.993333	0.997143		1.002222
6					0.98	0.986667	0.991429	0.995	0.997778
7						0.98	0.985714	0.99	0.993333
8							0.98	0.985	0.988889
9								0.98	0.984444
10									0.98

Hope this helps explain the background for the handicaps, note Olympic series still runs on NZTYA handicaps and doesn't change.

Cheers.

David
